

Linking of Sections of EHC Plan

A – Views, Interests & Aspirations

These should reflect both the child's/young persons and the parents

Content should only be written in the 1st person if this was actually said by the child/young person

E - Outcomes

A change resulting from intervention. NOT a description of services.

SMART and person-centred as this is more motivating for them.

Note: the LA can cease to maintain the EHCP at age 18 if the education and training outcomes have been achieved

B – Special Educational Needs

All SEND **must** be included, as you don't get the **provision** if you haven't got the **need**. The '**need**' is the barrier experienced – not solutions and not provision.

SEND should include needs for health and social care provision if they train or educate the child/young person.

F – Special Educational Provision required

Provision **must** be arranged by the LA even if not delivered by the LA (e.g. SALT, OT, Physio)

Must be specified for each and every need.

Must be quantified in terms of type, hours, frequency and expertise. ('Regular' is too vague)

Should specify: facilities, equipment, curriculum, modifications, residential accommodation if applicable.

C – Health needs relating to the SEND

Some healthcare needs will relate to the child/YPs SEND and so should be included.

CCG may also specify other healthcare needs not related to the SEND.

G – Health care provision reasonably required by the LDs or disabilities resulting in SEND

Should specify all agreed appropriate healthcare provision to meet the relevant health needs.

CCG is under duty to provide if it is in the EHCP (if they have agreed it beforehand).

Provision can include mediation, monitoring, therapy. **Must** be detailed, specific and quantified, and relate to the outcomes.

D – Social care needs which relate to the SEND

Must specify needs identified through assessment.

Must relate to the SEND.

H1 – Social care provision (for under 18's)

H2 – Other social care provision reasonably required (and any adult social care provision)

This relates to the use of a Personal Budget if it has been agreed.

H1 – S2 of the CSDPA 1970 / H2 – Care Act 2014/S17 of the CA 1989
